PLANT SCIENCE

Volume contents

Volume 101 (1994)

Special Issue – Proceedings of the 10th Annual Meeting of the Mid-Atlantic Plant Molecular Biology Society

Preface 1

The adenine phosphoribosyltransferase (APRT) selectable marker system
D.A. Schaff (Newark, DE) 3–9

Optimization of the transformation efficiency of *Agrobacterium tumefaciens* cells using electroporation
J.-J. Lin (Gaithersburg, MD) 11–15

Control of ribosome-inactivating protein (RIP) RNA levels during maize seed development
H.W. Bass, J.H. Goode, T.W. Greene, R.S. Boston (Raleigh, NC) 17–30

Substrate specificity of maize β-glucosidase
G.D. Babcock, A. Esen (Blackburg, VA) 31–39

Identification of chilling-responsive proteins from floral buds of blueberry
M.M. Muthalif, L.J. Rowland (College Park and Beltsville, MD) 41–49

Primary assimilation of nitrogen in alfalfa nodules: molecular features of the enzymes involved
C.P. Vance, R.G. Gregerson, D.L. Robinson, S.S. Miller, J.S. Gantt (St. Paul, MN) 51–64

Regulation of plant nodule-specific genes expressed in alfalfa nodules arrested at an early stage of development
T. Peng, R. Dickstein (Philadelphia, PA) 65–73

An RNA marker for epidermal cell type and differentiation
S. Mandaci, K. Thum, D. Maiti, J. Ho Pak, M.S. Dobres (Philadelphia, PA) 75–82

Role of colonization in biocontrol: studies with *Enterobacter cloacae*
D.P. Roberts, N.M. Short, Jr., A.P. Maloney, E.B. Nelson, D.A. Schaff (Beltsville and Greenbelt, MD; Ithaca, NY; Newark, DE) 83–89

REVIEW ARTICLE

Anthocyanins and betalains: evolution of the mutually exclusive pathways
H.A. Stafford (Portland, OR) 91–98

PHYSIOLOGY AND BIOCHEMISTRY

Ca^{2+}-calmodulin-stimulated superoxide generation by purified plasma membrane from wheat roots
Q.-S. Qiu, H.-G. Liang, H.-J. Zheng, P. Chen (Lanzhou, Peoples Republic of China) 99–104

Manganese-stimulated phosphatidylinositol 4-kinase from *Dunaliella parva*: purification and characterization
P. Steinert, J.B. Wissing, K.G. Wagner (Braunschweig, Germany) 105–114

The stimulation of taxol production in *Taxus brevifolia* by various growth retardants
G. Strobel, A. Stierle, W.M. Hess (Bozeman, MT; Provo, UT) 115–124

Roots of hydroponically grown *Taxus* plants as a source of taxol and related taxanes
E.R.M. Wickremesinhe, R.N. Arteca (University Park, PA) 125–135

0168-9452/94/$07.00 © 1994 Elsevier Science Ireland Ltd. All rights reserved

Tunicamycin and swainsonine stimulate *Lupinus albus* L. root growth in vitro
J. Costa, C.P. Pinto Ricardo (Oeiras and Lisboa, Portugal) 137–142
Thermoinhibition alters the polyamine levels in cotyledons and embryonic axes during germination of stratified chick-pea seeds
P. Muñoz de Rueda, A.J. Matilla, I.M. Sanchez-Calle, M. Bueno, M. Gallardo (Granada, Spain) . 143–150
Selection of *Arabidopsis thaliana* (L.) Heynh. mutants resistant to aspartate-derived amino acids and analogues
B. Heremans, M. Jacobs (Sint-Genesius-Rode, Belgium) 151–162

GENETICS AND MOLECULAR BIOLOGY
Date palm (*Phoenix dactylifera* L.) cultivar identification by RFLP and RAPD
B. Corniquel, L. Mercier (Angers, France) 163–172

CELL AND TISSUE STUDIES IN VITRO
High frequency direct shoot bud regeneration from excised leaves of mangosteen (*Garcinia mangostana* L.)
C.-J. Goh, P. Lakshmanan, C.-S. Loh (Singapore, Singapore) 173–180

GENERAL
Glycoprotein changes in vegetative to floral meristems of sorghum detected by biotinylated lectins
B.-J. Oh, R.A. Frederiksen, R.H. Smith (College Station, TX) 181–187
Histone H1 of the garden pea (*Pisum sativum* L.); composition, developmental changes, allelic polymorphism and inheritance
O.E. Kosterin, V.S. Bogdanova, F.L. Gorel, S.M. Rozov, Y.A. Trusov, V.A. Berdnikov (Novosibirsk, Russia) 189–202

Announcements 203–204
